

Lab: Scientific Method

Name: _____

Date: _____

Lab #: _____

Period: _____

Mr. Hodder

Problem: Can you list all of the steps of the scientific method and then create an experiment on your own?

Materials: TextBook, Mobius Strip, and Lab Sheet

Procedures

1. On the first line next to each number write down the steps of the Scientific Method.
2. Perform the Mobius Strip experiment.
3. On the lines below each method write the description that corresponds with it.
4. After observing the experiment create your own reproducible lab following the format of the scientific method.
